

Complicite

a disappearing number

...weaves together the story of two love affairs, separated by a century and a continent. The first happens now. The second is set in 1914. It tells of the heartbreaking collaboration between the greatest natural mathematician of the 20th century, Srinivasa Ramanujan, a penniless Brahmin from Madras in South India, and his British counterpart, the brilliant Cambridge don GH Hardy.

With a haunting original score by Nitin Sawhney, this piece of startling visual poetry from Simon McBurney and Complicite is a compelling meditation on love, mathematics and the pain of exile in an age when we think we can belong anywhere and have everything.
